AT LEHIGH UNIVERSITY

LU-WISE: Building Community: Sharing Research

The 2011-2012 LU-WISE Series considers interdisciplinary scholarship at Lehigh and abroad. We hope this forum for sharing experiences builds a supportive and empowering community for pursuing the relationships that foster successful research collaborations and career development.

On September 30, 2011:

Lehigh President Alice P. Gast joins us to discuss her role as **US Science Envoy** and share her observations of interdisciplinary science and engineering and the scientific work and influence of women abroad.

Jackie Krasas and **Diane Hyland** are on hand to discuss what ADVANCE learned about Lehigh from **YOUR** participation in interviews, focus groups, and the online survey as part of ADVANCE Research in the First Grant Year.

Tenure and non-tenure track STEM women faculty, professors of practice, and post-docs are welcome to RSVP. Lunch buffet sponsored by **Lehigh ADVANCE**.
